PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate (CGPA 9.65/10) with three internships in full-stack and backend development. Built REST APIs, React front ends, and database-backed services with Node.js, Express.js, and FastAPI, along with hands-on debugging and API testing. Solved 280+ problems on LeetCode (peak rating 1734) and advanced in the Purple Tech Challenge 2026 and Adobe University Hackathon 2026.

EXPERIENCE

- Full Stack Development Intern** — SkillDzire May 2026 – Jul 2026
- Built React.js features for a web application and wired them up to REST APIs for frontend-backend data flow.
 - Ran through application workflows to catch and fix functional bugs, working directly with teammates on the fixes.
- Web Developer Intern** — AIM Technologies, Kakinada May 2025 – Jul 2025
- Developed React.js components and connected them to REST APIs to support core application functionality.
 - Tested features end-to-end, flagged functional issues, and helped push through quality improvements.
- Software Development Engineer Intern** — Bluestock Fintech Apr 2025 – May 2025
- Built modular backend functionality for a fintech web application using Node.js and Express.js.
 - Tested REST APIs with Postman, tracing issues to keep API delivery reliable.

PROJECTS

- Async Content Moderation Service** [GitHub](#)
- Built an event-driven moderation pipeline with Node.js, Express.js, Redis Pub/Sub, and PostgreSQL for asynchronous content processing.
 - Added rate limiting, Docker packaging, and automated tests to improve request handling reliability.
- LLM Semantic Router** [GitHub](#)
- Built a Python/FastAPI service that uses embeddings to classify incoming queries and route them to the right specialized handler.
 - Added confidence-based fallback, manual override, and request logging; verified behavior against 15+ edge cases.
- CareerLens: Explainable Large Language Models for Semantic Job Matching and Skill-Gap Analysis**
- Developed an NLP pipeline that parses resumes and job descriptions, extracts and normalizes skills, and finds skill matches.
 - Combined exact/normalized skill matching with Sentence Transformer embeddings, cosine similarity, and TF-IDF for semantic job matching.
 - Added an explainable LLM layer for skill-gap analysis, guided by research on semantic retrieval and explainable AI for job recommendation.

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL
Development: React.js, Node.js, Express.js, FastAPI, Spring Boot, REST APIs
Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite
Testing & Tools: Postman, Git, GitHub, Docker, GitHub Actions, Linux, CI/CD, pytest
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
AI: LLMs, RAG, Embeddings, Sentence Transformers, Semantic Search, NLP, AI Agents, Gemini API

EDUCATION

- Aditya University, Surampalem, A.P.** 2023 – 2027
- B.Tech, Computer Science & Engineering | CGPA: 9.65/10
- Sri Chaitanya Junior College, Tuni, A.P.** 2021 – 2023
- Intermediate (BIE, A.P.) | 975/1000
- Sreshta Vidya Bhavan, Annavaram, A.P.** 2021
- SSC (BSE, A.P.) | 588/600

ACHIEVEMENTS & CERTIFICATIONS

- Solved 280+ problems on LeetCode; peak contest rating of 1734.
- Advanced to Round 2 of the Purple Tech Challenge 2026 and progressed through advanced rounds of the Adobe University Hackathon 2026 and AI Super 20.
- Won 2nd Prize in the VEDA 2024 Technical Quiz.
- Certifications: NVIDIA Fundamentals of Deep Learning, HackerRank SQL (Basic), Git & GitHub, JLPT N5.
- Positions of Responsibility: NSS Club Member.
